

Sioux Lyon County LTRG is partnering with World Renew Disaster Response Services (DRS) to find individuals with unmet needs resulting from the flood that happened in June 2024. If you are a June 2024 Flood survivor that still needs help restoring your life, please come to one of the walk-in centers listed below for a survey with World Renew DRS volunteers.

This is your chance to request help. No appointment will be necessary. Unmet needs will be recorded and reported to your local recovery organization. This assessment allows Sioux Lyon County LTRG to follow up with individuals and families needing construction work, mold removal, spiritual or emotional care, urgent medical needs or basic household items replaced. Sioux Lyon County LTRG will work hard to secure financial grants and other means and materials to address the high-priority needs documented in your surveys.

If you have a question about how this will help your recovery efforts or if you are unable to travel to the walk-in center, please call the number listed below.

Hawarden City Office
